## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see Remarks, filed September 28, 2006, with respect to claims 1 and 11 have been fully considered and are persuasive. The rejection of claims 1-14 has been withdrawn. New claims 15-20 are accepted.

### ***Allowable Subject Matter***

2. Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding claim 1, the prior art does not teach or suggest the claimed system for voltage stabilization of a power supply, comprising, inter alia, *orthogonal* fluxes are generated in the magnetic core when the main winding and the control winding are energized.

Regarding claim 11, the prior art does not teach or suggest a method of stabilizing a voltage, comprising the step of generating *orthogonal* magnetic fields in a magnetic core of the controllable inductance, and adjusting the orthogonal magnetic fields to control the permeability of the magnetic core.

The instant application is deemed to be directed to a nonobvious improvement over the prior art cited in the non-final rejection (May 25, 2006).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
